

Digital Technology for Development

Harnessing the potential of Information and Communication Technologies (ICTs) enables parliaments to make their working methods more effective, accountable and transparent and expands public participation. Building the necessary infrastructure, capacity and knowledge requires continued vision, leadership and investment.

SUPPORT TO THE INTER-PARLIAMENTARY UNION'S CENTRE FOR INNOVATION IN PARLIAMENT

World e-Parliament Report

Based on data from 116 parliaments.

Innovation tracker

Blog about recent innovations in parliaments' work.

Webinars on transforming parliaments

Unpacking strategic issues such as how parliaments can make data more accessible or measure parliamentary performance.
